

Headway Tutors

GCSE PREPARATION – MATHS & PHYSICS

The needs of the student

My daughter moved primary schools and, like any big change, it knocked her confidence and resulted in her not believing in herself and her abilities – particularly in Maths. With English, she needed some help with consolidating information and renewing her joy of reading! I approached Headway Tutors in search of a tutor who would be able to encourage her gently, as well as push her to challenge herself.

The feedback

From the student:

What three words can you think of to describe your tutor?

"Anthony is clever, engaging and funny."

What makes you excited about going to a tutoring session?

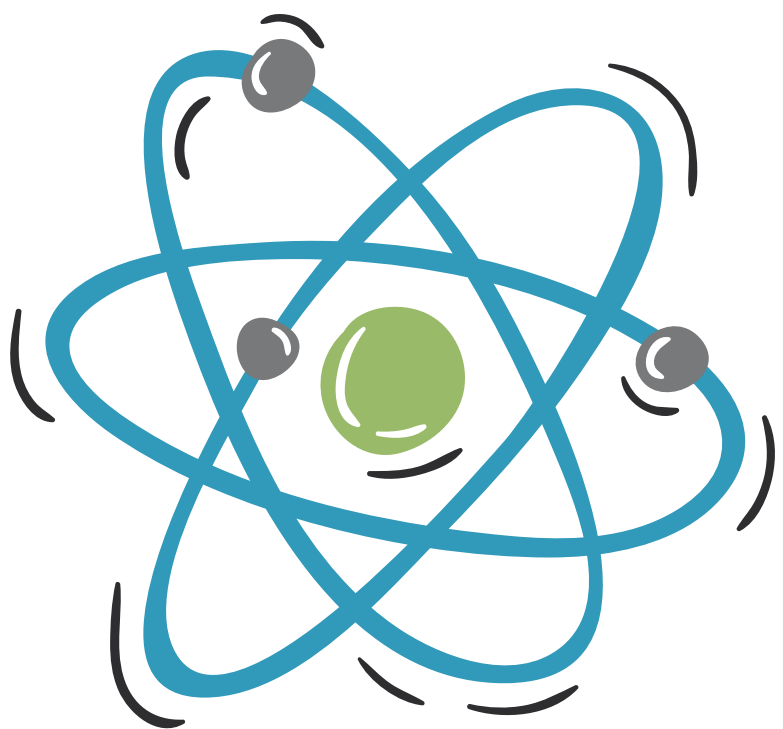

"I know I will get everything out of it that I want and I get on really well with my tutor."

Have you learnt anything new? If so, what is it?

"I definitely have. Anthony has given me more confidence in applying my skills during Maths tests. He taught me about time management and how to look at an exam in a totally different way, so that I can truly digest the questions."

What does your tutoring session give you that school doesn't?

"More one-to-one time to ask questions. The personal interaction makes it about my needs, not about the whole class."

From Mum:

Headway Tutors has been so supportive from start to finish. They are always there if we have any questions and truly take care in matching the needs of the student to right personality fit and ability level of the tutor. I have already recommended them to my friends and will continue to do so!
